

HALF-S

The half-S is a secure slip knot or hitch which can be used to fasten a rope to a ring or pole.

The half-S is the same as the first part of the "S" knot shown earlier in this knotting section.

1. Start with a bight around or through the securing object (ring or pole).
2. Bring the end of the rope around to the standing part and make four overhand loops over both ropes before passing the end down through the centre of the knot.
3. Pull the standing part to tighten the knot.
