

BUTTERFLY KNOT

This knot provides one that will not slip and which may be tied without using the ends of the rope. It is used for providing a harness, for hauling heavy loads and for climbing.

Pick up a bight of the rope in one hand and hold both parts in the other Fig. 1. Twist the bight once to cross the two parts Fig. 2, twist again to produce hole A Fig. 3. Fold bight back over loop passing tip down between the two parts C and up through A Fig. 4, now pull bight through and tighten knot.
